FastAPI is the primary backend framework used for modern API development.

18. Which frontend technologies do you use?

Frontend development uses:

- **HTML**
 - **CSS**
 - **JavaScript**
 - **React**
-

19. Which databases do you use?

The company works with:

- **PostgreSQL**
- **SQLite**

- MySQL
 - ChromaDB
-

20. Do you use Docker?

Yes.

Docker is used for application deployment and development environments.

Development Process

21. How do projects begin?

Projects usually start with a requirement discussion followed by solution planning and technical analysis.

22. What is your development process?

The standard process includes:

- 1. Requirement Gathering**
 - 2. Solution Design**
 - 3. Development**
 - 4. Testing**
 - 5. Deployment**
 - 6. Maintenance**
-

23. Do you provide project documentation?

Yes.

Technical documentation and user documentation can be provided depending on project requirements.

Integration

24. Can you integrate existing software?

Yes.

Existing software can be integrated using APIs and secure communication methods.

25. Which third-party services can you integrate?

Examples include:

- **Gmail**
 - **Google Calendar**
 - **Google Drive**
 - **Google Sheets**
 - **Payment Gateways**
 - **CRM Systems**
 - **ERP Systems**
 - **REST APIs**
-

Security

26. How is customer data protected?

Applications are designed with secure authentication, authorization, encrypted communication, and secure database practices.

27. Is company information kept confidential?

Yes.

Client information and project data are treated as confidential.

Support

28. Do you provide maintenance after deployment?

Yes.

Support includes:

- **Bug fixes**
 - **Performance improvements**
 - **Feature updates**
 - **Technical assistance**
-

29. Can new features be added later?

Yes.

Applications are designed to support future enhancements.

Pricing

30. How is project pricing determined?

Pricing depends on:

- **Project scope**
 - **Features**
 - **Technology requirements**
 - **Timeline**
 - **Integration complexity**
-

31. Do you offer fixed-price projects?

Depending on project requirements, fixed-price or milestone-based pricing models may be available.

Timeline

32. How long does development take?

Project duration depends on complexity.

Small projects may take a few weeks, while enterprise applications may require several months.

Artificial Intelligence Chatbots

33. Can the chatbot answer questions from company documents?

Yes.

The chatbot can retrieve information from PDFs, Word documents, policies, manuals, and knowledge bases.

34. Can the chatbot remember previous conversations?

Conversation memory can be implemented depending on project requirements.

35. Can the chatbot support multiple documents?

Yes.

Multiple documents can be indexed into a single searchable knowledge base.

36. Can the chatbot be integrated into a website?

Yes.

AI chatbots can be integrated into existing websites and web applications.

Workflow Automation

37. Can customer inquiries automatically create leads?

Yes.

Website forms can automatically create leads and trigger business workflows.

38. Can meetings be scheduled automatically?

Yes.

Meeting scheduling can be automated using calendar integrations.

39. Can confirmation emails be sent automatically?

Yes.

Automated email notifications can be configured for customers and internal teams.

General Questions

40. Why should I choose Madhulata Solutions?

Businesses choose Madhulata Solutions because of its expertise in Artificial Intelligence, workflow automation, modern software development, customized business solutions, and long-term technical support.

41. Do you provide consultation before starting a project?

Yes.

Project discussions and technical consultations are available before development begins.

42. Do you work with international clients?

Yes.

Remote development and communication enable collaboration with clients worldwide.

43. Can you modernize an existing application?

Yes.

Existing applications can be upgraded with new technologies, improved user interfaces, API integrations, and AI capabilities.

44. Do you develop scalable software?

Yes.

Applications are designed using scalable architectures that support future business growth.

45. How can I contact Madhulata Solutions?

You can contact the company through the official website, email, phone number, or contact form provided on the company website.

Contact Information

Company Name: Madhulata Solutions

Business Hours: Monday to Saturday, 9:00 AM to 6:00 PM IST

Email: info@madhulatasolutions.com (Replace with your official email.)

Phone: +91-XXXXXXXXXX (Replace with your official phone number.)

Recommendation for Better RAG Performance

Instead of one very large FAQ document, consider splitting it into focused FAQ files such as:

- Company_FAQs.pdf
- Service_FAQs.pdf
- AI_FAQs.pdf
- Technical_FAQs.pdf
- Pricing_FAQs.pdf
- Support_FAQs.pdf

This improves semantic retrieval because each document covers a narrower topic, making it easier for LangChain to return the most relevant context for user questions.
