

Pricing Guide

Madhulata Solutions

Artificial Intelligence | Software Development | Workflow Automation | Digital Transformation

Introduction

This Pricing Guide provides general information about the pricing structure followed by Madhulata Solutions.

Project pricing depends on business requirements, technical complexity, integrations, timeline, and customization.

All prices mentioned in this document are estimated starting ranges and should be treated as indicative only. A detailed proposal is prepared after understanding the client's requirements.

Pricing Philosophy

Madhulata Solutions follows a transparent pricing approach based on:

- **Project scope**
- **Business requirements**
- **Technical complexity**
- **Development time**
- **Third-party integrations**
- **Infrastructure requirements**
- **Post-deployment support**

Every project is analyzed individually before a final quotation is provided.

Custom quotation

Factors Affecting Pricing

Project pricing depends on several factors, including:

- **Number of features**
 - **User roles**
 - **AI model selection**
 - **Number of integrations**
 - **API development**
 - **Database complexity**
 - **Security requirements**
 - **Cloud deployment**
 - **Performance requirements**
 - **Timeline**
 - **Post-launch support**
-

Engagement Models

Madhulata Solutions offers multiple engagement options.

Fixed Price

Suitable for projects with clearly defined requirements and scope.

Milestone-Based

Payments are divided into agreed milestones throughout the project lifecycle.

Dedicated Development

A dedicated development team works exclusively on the client's project for an agreed duration.

Hourly Consulting

Best suited for advisory services, architecture reviews, and technical guidance.

Payment Terms

Typical payment structure:

- **Project confirmation**
- **Initial advance payment**
- **Milestone-based payments**
- **Final payment upon project completion**

The exact payment schedule is defined in the project proposal.

Project Timeline

Development timelines vary depending on project complexity.

Typical durations:

- **Small Project: 2–4 weeks**
 - **Medium Project: 1–3 months**
 - **Large Project: 3–6 months**
 - **Enterprise Project: Based on requirements**
-

Additional Services

Optional services include:

- **Cloud deployment**
- **Server setup**
- **Docker configuration**
- **API integrations**
- **User training**
- **Technical documentation**
- **Performance optimization**

These services are quoted separately if not included in the main project scope.

Frequently Asked Questions

Are the prices fixed?

No. The prices in this guide are estimated ranges. Final pricing depends on project requirements and complexity.

Is a quotation provided before development?

Yes. A detailed proposal and quotation are prepared after understanding the project requirements.

Can project requirements change after development begins?

Yes. Additional features or scope changes are evaluated separately and may affect the project timeline and pricing.

Is maintenance included?

Maintenance can be included through separate support plans or customized service agreements.

Do you provide free consultations?

An initial consultation is generally available to understand project requirements and discuss possible solutions. Further consulting services may be billed depending on the scope.

Can international clients hire Madhulata Solutions?

Yes. The company works with clients globally through online meetings and remote project management.
